ASSET & PROPERTY MANAGEMENT

Our dedicated client-focused team purposefully includes a property manager & property accountants. We are committed to building strong relationships and by insisting on best in class standards from all our staff, we strive to ensure our clients are provided with professional advice and exceptional customer care.

At Dunlop Heywood we have operated a number of tools and processes for many years that have noticeably added value to the service our clients receive. These include:

- **Client charter** - we set up stringent key performance indicators that measure our performance to ensure that we adhere to high standards of service delivery.
- **Customer satisfaction surveys** - our own performance in a number of key qualitative measures is regularly gauged by our occupiers.
- **Tenant audits** - we carry out an annual survey of the occupational needs of the tenant, for example, what is driving their business space needs. This ensures our clients derive the maximum notice of any opportunities as they arise.

Our team has considerable experience in understanding business objectives and property portfolios. This ensures that we put in place tailored strategies with due regard to risk and cost. We can undertake a strategic review of your real estate assets including liabilities and assess the operational needs of your business. We are then able to give you valuable advice with appropriate support.

Understanding your business strategy is the key to developing a successful Asset Management Strategy. Working with our other specialist teams we can provide you with relevant property solutions and identify opportunities for your business to release value and improve income streams.
